Intended Use

The WT212 3D wet out table is intended to distribute resin in liners for use in cured in place pipe (CIPP) operations. The wet out table functions with liners with a diameter of 2-12" (5.08-30.48cm).

The machine is designed for operation in temperatures from 32° to 100° F (0° to 37.8° C). Contact your HammerHead® dealer for provisions required for operating in extreme temperatures. Use in any other way is considered contrary to the intended use.

The wet out table should be operated, serviced, and repaired only by persons familiar with its particular characteristics and acquainted with the relevant safety procedures.

Equipment Modification

This equipment was designed and built in accordance with applicable standards and regulations. Modification of equipment could mean that it will no longer meet regulations and may not function properly or in accordance with the operating instructions. Modification of equipment should only be made by competent personnel possessing knowledge of applicable standards, regulations, equipment design functionality/requirements and any required specialized testing.
Machine Components

1. Control station
2. Compression rollers
3. Conveyor belt
Electromagnetic Compatibility Statement

U.S.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by The Charles Machine Works, Inc. could void the user’s authority to operate the equipment.

Canada

CAN ICES-3(A)/NMB-3(A)
Operator Orientation

**IMPORTANT:** Top view of machine is shown.

1. Front
2. Right side
3. Rear
4. Left side

Operating Area

**IMPORTANT:** Top view of machine is shown.

Operator should stand only in the location shown.
About This Manual

This manual contains information for the proper use of this machine. See Operation Overview for basic operating procedures. Cross references such as “See page 50” will direct you to detailed procedures.

Bulleted Lists

Bulleted lists provide helpful or important information or contain procedures that do not have to be performed in a specific order.

Numbered Lists

Numbered lists contain illustration callouts or list steps that must be performed in order.
This manual is an important part of your equipment. It provides safety information and operation instructions to help you use and maintain your HammerHead® equipment.

Read this manual before using your equipment. Keep it with the equipment at all times for future reference. If you sell your equipment, be sure to give this manual to the new owner.

If you need a replacement copy, contact your HammerHead dealer. If you need assistance in locating a dealer, visit our website at www.hammerheadtrenchless.com or write to the following address:

HammerHead Trenchless Equipment
500 South C.P. Avenue
Lake Mills, WI 53551
USA

The descriptions and specifications in this manual are subject to change without notice. Earth Tool Company LLC reserves the right to improve equipment. Some product improvements may have taken place after this manual was published. For the latest information on HammerHead equipment, see your HammerHead dealer.

Thank you for buying and using HammerHead equipment.

Overview - machine serial number, information about the type of work this machine is designed to perform, basic machine components, and how to use this manual

Foreword - part number, revision level, and publication date of this manual, and factory contact information

Safety - machine safety alerts and emergency procedures

Controls - machine controls and indicators and how to use them

Prepare - procedures for inspecting and classifying the jobsite, planning the installation, and preparing the jobsite for work

Transport - procedures for lifting and hauling

Operate - procedures for operating the equipment

Complete the Job - procedures for restoring the jobsite and storing equipment

Service - service intervals and instructions for this machine including lubrication, replacement of wear items, and basic maintenance

Specifications - machine specifications including weights, measurements, power ratings, and fluid capacities

Support - the warranty policy for this machine, and procedures for obtaining warranty consideration and training

Service Record - a record of major service performed on the machine

Guidelines ........................................... 14
Safety Alert Classifications ...................... 17
Machine Safety Alerts .......................... 18
WT212 3D Operator’s Manual
Guidelines

When you see this safety alert sign, carefully read and follow all instructions. YOUR SAFETY IS AT STAKE. Read this entire section before using your equipment. SAVE THESE INSTRUCTIONS.

Follow these guidelines before operating any jobsite equipment:

• Complete proper training and read operator’s manual before using equipment.
• Mark proposed path with white paint and have underground utilities located before working. In the US or Canada, call 811 (US) or 888-258-0808 (US and Canada). Also contact any local utilities that do not participate in the One-Call service. In countries that do not have a One-Call service, contact all local utility companies to have underground utilities located.
• Classify jobsite based on its hazards and use correct tools and machinery, safety equipment, and work methods for jobsite.
• Mark jobsite clearly and keep spectators away.
• Wear personal protective equipment.
• Review jobsite hazards, safety and emergency procedures, and individual responsibilities with all personnel before work begins. Safety Data Sheets (SDS) are available at www.hammerheadtrenchless.com/parts & services.
• Fully inspect equipment before operating. Repair or replace any worn or damaged parts. Replace missing or damaged safety shields and safety signs. Contact your HammerHead® dealer for assistance.
• Use equipment carefully. Stop operation and investigate anything that does not look or feel right.
• Do not operate unit where flammable gas may be present.
• Only operate equipment in well-ventilated areas.
• Contact your HammerHead dealer if you have any question about operation, maintenance, or equipment use.
• To reduce risk of injury, close supervision is necessary when a product is used near children.
• Know how to stop the product and bleed pressures quickly.
• Stay alert — watch what you are doing.
• Do not operate product when fatigued or under the influence of alcohol or drugs.
• Do not overreach or stand on unstable support. Keep good footing and balance at all times.
• To disconnect, turn all controls to the off ("O") position, then remove plug from outlet.
• Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
• Unplug from outlet when not in use and before servicing or cleaning.
• For a grounded appliance, Connect to a properly grounded outlet only. See grounding instructions.
Grounding Instructions

This product must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce risk of electric shock. This product is equipped with a cord with equipment-grounding and a grounding plug (shown). The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

Extension Cord Use

Extension cords are available and may be used if care is exercised in their use. Follow these guidelines with using an extension cord:

- The marked electrical rating of the extension cord should be at least as great as the electrical rating of the machine.
- The extension should be a grounding type 3-wire cord.
- The extension cord should be marked with suffix letter “W” and with a tag stating “Suitable for Use with Outdoor Appliances”.
- The extension cord should be arranged so that it will not drape over obstacles in such a way that it can be tripped over, snagged, or pulled unintentionally (especially by children).
- The extension cord connecting to the unit should be kept dry and off the ground.
- When using an extension cord, do not clean the appliance with water spray or the like, store indoors when not in use, and keep out of reach of children.
If Machine Catches on Fire

Perform emergency shutdown procedure and then take the following actions. The order and degree of action will depend on the situation.

• Immediately disconnect power from outlet, if possible.
• If fire is small and fire extinguisher is available, attempt to extinguish fire.
• If fire cannot be extinguished, leave area as quickly as possible and contact emergency personnel.
Safety Alert Classifications

These classifications and the icons defined on the following pages work together to alert you to situations which could be harmful to you, jobsite bystanders or your equipment. When you see these words and icons in the book or on the machine, carefully read and follow all instructions. YOUR SAFETY IS AT STAKE.

Watch for the three safety alert levels: DANGER, WARNING and CAUTION. Learn what each level means.

⚠️ DANGER indicates a hazardous situation that, if not avoided, will result in death or serious injury. This signal word is to be limited to the most extreme situations.

⚠️ WARNING indicates a hazardous situation that, if not avoided, could result in death or serious injury.

⚠️ CAUTION indicates a hazardous situation that, if not avoided, could result in minor or moderate injury.

Watch for two other words: NOTICE and IMPORTANT.

NOTICE indicates information considered important, but not hazard-related (e.g., messages relating to property damage).

IMPORTANT can help you do a better job or make your job easier in some way.
1. Moving parts. Contact can cause serious injury. Stay away.

2. Read operator’s manual. Follow safety rules and know how to use all controls. Your safety is at stake.

  • Check Supplies ............................................. 26
  • Prepare Equipment ....................................... 26
Gather Information

A successful job begins before you dig. The first step in planning is reviewing information already available about the job and jobsite.

Review Job Plan

Review blueprints or other plans. Check for information about existing or planned structures, elevations, or proposed work that may be taking place at the same time.

Notify One-Call Services

Mark proposed path with white paint and have underground utilities located before working.

- In the US or Canada, call 811 (US) or 888-258-0808 (US and Canada). Also contact any local utilities that do not participate in the One-Call service.
- In countries that do not have a One-Call service, contact all local utility companies to have underground utilities located.

Arrange for Traffic Control

If working near a road or other traffic area, contact local authorities about safety procedures and regulations.

Plan for Emergency Services

Have the telephone numbers for local emergency and medical facilities on hand. Check that you will have access to a telephone.
Inspect Site

- Follow U.S. Department of Labor regulations on excavating and trenching (Part 1926, Subpart P) and other similar regulations.

- Mark proposed path with white paint and have underground utilities located before working. In the US or Canada, call 811 (US) or 888-258-0808 (US and Canada). Also contact any local utilities that do not participate in the One-Call service. In countries that do not have a One-Call service, contact all local utility companies to have underground utilities located.

- Inspect jobsite and perimeter for evidence of underground hazards, such as:
  - “Buried utility” notices
  - Utility facilities without overhead lines
  - Gas or water meters
  - Junction boxes
  - Drop boxes
  - Light poles
  - Manhole covers
  - Sunken ground

- Mark location of all buried utilities and obstructions.

Prepare Jobsite

**WARNING** Jobsite hazards could cause death or serious injury. Use correct equipment and work methods. Use and maintain proper safety equipment.

Ensure area where unit will be operated is on level and firm ground.
Check Supplies and Prepare Equipment

Check Supplies

- personal protective equipment, such as hard hat and safety glasses
- air compressor
- air hose
- resin
- hardener
- liner
- vacuum

Prepare Equipment

Condition and Function

- all controls

![WARNING] Improper control function could cause death or serious injury. If control does not work as described in instructions, stop machine and have it serviced.

- hoses and valves
- cables and plugs
Transport

Chapter Contents

Lift ......................................................... 28
Tie Down .................................................. 28
This machine is not configured for lifting. If it must be lifted, load machine into a container or onto a platform appropriate for lifting. Use lifting device capable of supporting machine’s size and weight. See “Specifications” on page 45 or measure and weigh equipment before lifting.

**Tie Down**

When tying down machine, use extra caution to prevent any movement during sudden take-offs and stops. Secure the system in a way that prevents movement to the system.
Chapter Contents

Set Up and Configure ......................... 30
Operate ...........................................
Shut Down ................................. 31
Set Up and Configure

**IMPORTANT:** For information on preparing resin and liner, see Installation and Procedures Guide.

1. Lock wheels.
2. Connect foot pedal and position for easy access to all controls.

**IMPORTANT:** Only operate in designated operating area. See “Operating Area” on page 6.

3. Plug in machine.

**DANGER** Electric shock. Improper connection of equipment-grounding conductor will cause death or serious injury. Contact qualified electrician to ensure outlet is properly grounded.

4. Connect air hose to table at valve.

5. Set roller gap. Roller gap is determined by liner and resin being used. See HammerHead® Rehab Calculator app for gap settings or contact your HammerHead dealer.
Operate

1. Place liner on belt with end near rollers.
2. Attach vacuum to liner.
3. Set belt speed to low.
4. Set belt direction toward rollers.
5. Start belt movement.
6. Push liner through rollers.
7. Hang cuff of liner on cuff hanger (shown), to prevent resin from leaking.
8. Adjust belt speed so resin is evenly distributed through liner.

To help avoid injury:

• Keep everyone away from belt and rollers while operating.
• Stop button stops all movement and releases rollers.

Shut Down

1. Set all controls to off.
2. Unplug machine.

IMPORTANT: Only unplug at plug. Do not unplug by pulling on cord.
3. Disconnect air.
4. Stow foot pedal.
Complete the Job

Chapter Contents

Stow Components ......................... 34
Stow Tools ............................... 34
Stow Components

Load unit as specified to transport. See “Transport” on page 25 for more information.

Stow Tools

Make sure all accessories and tools are loaded and properly secured.

For long term storage, store in a protected environment, out of the elements.

</tr>
</tbody>
</table>

Proper lubrication and maintenance protects HammerHead® equipment from damage and failure. Service intervals listed are minimum requirements. In extreme conditions, service machine more frequently. Use only recommended lubricants.

**NOTICE:**

- Use only genuine HammerHead parts and approved lubricants to maintain warranty.
- Use the “Service Record” on page 49 to record all required service to your machine.
10 Hours

<table>
<thead>
<tr>
<th>Tasks</th>
<th>Notes</th>

<td>PTO</td>
</tr>
</tbody>
</table>

Check Air Filter

Check air filter every 500 hours.
1. Remove rear cover.
2. Remove filter cover (1) and inspect filter for damage or debris.
3. Replace filter as needed.
4. Install rear cover.

Drain Water Separator

Drain water separator at plug (2) every 500 hours.
Check Oil Level

Check oil level every 500 hours.

1. Remove rear cover.
2. Check level at tank (2).
3. Add PTO at fill (1) as needed to keep level at halfway point on tank.
4. Install rear cover.
### As Needed

<table>
<thead>
<tr>
<th>Tasks</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grease wheels</td>
<td>EPG</td>
</tr>
<tr>
<td>Adjust conveyor belt tracking</td>
<td></td>
</tr>
<tr>

<tr>
<td>Change air filter</td>
<td></td>
</tr>
<tr>
<td>Change oil</td>
<td>PTO</td>
</tr>
</tbody>
</table>

**Grease Wheels**

Grease wheels with EPG at zerks.
Adjust Conveyor Belt Tracking

Adjust conveyor belt tracking at bolts (shown) as needed.

To adjust:

1. Tighten bolts (shown) on both sides of machine.
   - To move belt left, tighten right bolt.
   - To move belt right, tighten left bolt.

2. Plug in machine.
3. Move conveyor belt using start/stop pedal.
4. Monitor belt. If it moves left or right, stop belt movement, unplug machine, and repeat step one.
Replace Drive Belt

Replace drive belt as needed.

To replace:
1. Remove panel on left side of machine.
2. Replace drive belt (shown).
3. Reinstall panel.

Reset Circuit Breaker

![Warning]

**WARNING**
Electric shock. Contact can cause death or serious injury.

Disconnect from supply circuit before opening or servicing.

Reset circuit breaker (shown) as needed.
Check Valves and Hoses

**WARNING** Pressurized fluid or air could pierce skin and cause severe injury. Refer to operator’s manual for proper use. 270-6035

To help avoid injury:

- Use a piece of cardboard or wood, rather than hands, to search for leaks.
- Wear protective clothing, including gloves and eye protection.
- Before using system, check that all connections are tight and all lines are undamaged.

Check valves and hoses as needed for leaks, loose fittings, unusual noise or vibration. Repair or replace if needed.

---

Change Air Filter

Change air filter as needed.

1. Remove rear cover.
2. Drain at plug (2).
3. Remove cover (1).
4. Replace filter.
5. Install cover.
6. Install rear cover.
Change Oil

Change oil as needed.

1. Remove rear cover.
2. Drain at plug (3).
3. Install plug.
4. Add PTO at fill (1) to keep level at halfway point on tank (2).
5. Install rear cover.

Support

Procedure

Notify your dealer immediately of any malfunction or failure of HammerHead® equipment.

Always give model, serial number, and approximate date of your equipment purchase. This information should be recorded and placed on file by the owner at the time of purchase.

Return damaged parts to dealer for inspection and warranty consideration if in warranty time frame.

Order genuine HammerHead replacement or repair parts from your authorized HammerHead dealer. Use of another manufacturer's parts may void warranty consideration.

Resources

Publications

Contact your HammerHead dealer for publications and videos covering safety, operation, service, and repair of your equipment.

HammerHead Training

For information about on-site, individualized training, contact your HammerHead dealer.
Limited Warranty Policy

Earth Tool Company LLC, hereinafter sometimes referred to as ETC warrants each new industrial product of its own manufacture to be free from defects in material and workmanship, under normal use and service for one full year after delivery to the owner or 1000 operating hours, whichever occurs first. During the warranty period, the authorized selling HammerHead® Dealer shall furnish parts without charge for any HammerHead product that fails because of defects in material and workmanship. Warranty is void unless warranty registration card is returned within ten days from the date of purchase. This warranty and any possible liability of Earth Tool Company LLC here under is in lieu of all other warranties, express, implied, or statutory, including, but not limited to any warranties of merchantability or fitness for a particular purpose.

The parties agree that the Buyer’s SOLE AND EXCLUSIVE REMEDY against ETC, whether in contract or arising out of warranties, representations, or defects shall be for the replacement or repair of defective parts as provided herein. In no event shall ETC’s liability exceed the purchase price of the product. The Buyer agrees that no other remedy (including, but not limited to, incidental or consequential loss) shall be available to him. If, during the warranty period, any product becomes defective by reason of material or workmanship and Buyer immediately notifies ETC of such defect, ETC shall, at its option, supply a replacement part or request the return of the product to its plant in Lake Mills, Wisconsin. No part shall be returned without prior written authorization from ETC, and this warranty does not obligate ETC to bear any transpiration charges in connection with the repair or replacement of defective parts. Earth Tool Company LLC will not accept any charges for labor and/or parts incidental to the removal or remounting of parts repaired or replaced under this Warranty.

This Warranty shall not apply to any part or product which shall have been installed or operated in a manner not recommended by ETC nor to any part or product which shall have been neglected, or used in any way which, in ETC’s opinion, adversely affects its performance; nor negligence of proper maintenance or other negligence, fire or other accident; nor with respect to wear items; nor if the unit has been repaired or altered outside of an ETC authorized dealership in a manner of which, in the sole judgment of ETC affects its performance, stability or reliability; nor with respect to batteries which are covered under a separate adjustment warranty; nor to any product in which parts not manufactured or approved by ETC have been used, nor to normal maintenance services or replacement of normal service items. Equipment and accessories not of our manufacture are warranted only to the extent of the original Manufacturer’s Warranty and subject to their allowance to us, if found defective by them. ETC reserves the right to modify, alter, and improve any product or parts without incurring any obligation to replace any product or parts previously sold with such modified, altered, or improved product or part. No person is authorized to give any other Warranty, or to assume any additional obligation on ETC’s behalf unless made in writing, and signed by an officer of ETC.
