BLUeLiGHT CURING METHOD SYSTEM

BLUeLiGHT

**LINER
FEAT. HELIAM[®] SCRIM**

RESIN

SMART DESIGN. LIGHT FOOTPRINT.

ALLEVIATES TIME PRESSURES: Bluelight system was specifically formulated with resin that only cures with the “blue” light source, giving it extended pot life so installers don’t have to worry about working time.

ENVIRONMENTALLY SAFE: Controlled manufacturing process ensures quality and resins that are free from styrenes, odors or VOCs.

WORKS FAST: The automated curing system and intensity of the LED light head allows the resin to cure up to five times faster than other methods.

CONFIDENT CURE: Bluelight is the only LED-based CIPP system certified under IAPMO, ICC, and IPC. Every component—the curing unit, liner, and resin—is tested as a system on a quarterly basis to ensure performance and consistency. This approach reduces installation errors, cuts back on rework, and helps your team stay focused on jobsite productivity.

**Curing speeds vary based on diameter and wall thickness*

LIGHTEN YOUR LOAD WITH ENHANCED FEATURES AND BENEFITS

1. INTERCHANGEABLE REELS

- Convenient transportation
- Keeps you operating if a reel requires service
- Universal trolley for all reels

Reel Options	064	144	336	696
Available Lengths	33m	40m	40m/80m	50m/100m
	108ft	131ft	131ft/262ft	164ft/328ft
Push/Pull Lengths	12m/33m	40m/40m	40m/80m*	50m/100m
	39ft/108ft	131ft/131ft	131ft/262ft*	164ft/328ft

*336 80m/262ft requires pull in

2. PORTABILITY

- Lightweight design (about 150 lbs.) is easily transportable
- Ergonomic frame makes it easier to work around tight job sites

3. AUTOMATED PULLBACK

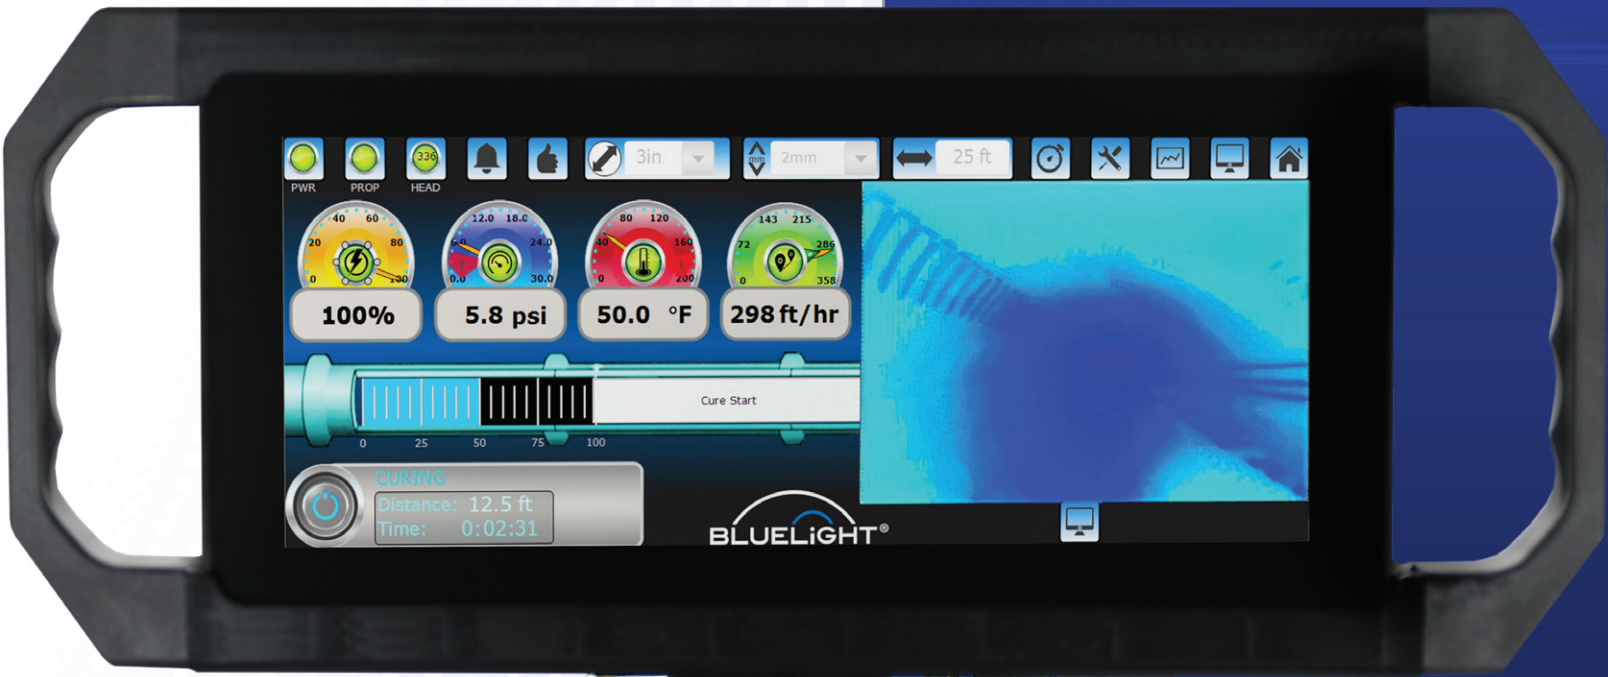

- Reduce any errors with an onboard computer that controls speed based on job-specific parameters

4. INTEGRATED CAMERA

- Monitor progress and quality of installation

5. INTERFACE SCREEN

- Enter job specs and automatically get the right pullback speed
- If levels fall below requirements, red light alerts the installer
- Monitor curing process in real time
- Multiple mounting options for ease of use

IT'S THE LIGHT WAY TO GO

REHABILITATE 2-18"
sewer and small drain pipes,
**ADDING UP TO 50 MORE
YEARS OF SERVICE LIFE**
to an existing line.

LIGHT HEADS FOR ANY JOB

Designed with precision-engineered LED technology for consistent, high speed curing:

- 4 patented light heads for pipe diameters 2” to 18”
- Powerful visible light spectrum ensures 100% deep resin cure
- Outperforms UV systems with focused, efficient energy delivery

SYSTEM COMPONENTS

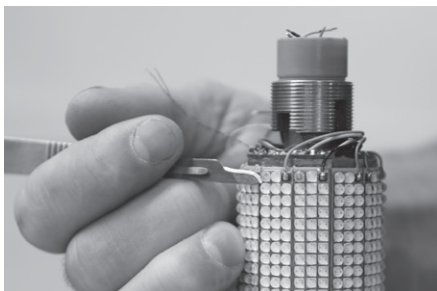

BLUELIGHT LINER CONFIGURATIONS

	2"	3"	4"	5"	6"	8"	10"	12"-18"
