GENERAL INFORMATION / PRODUCT OVERVIEW

PRODUCT DESCRIPTION:

This product has been created to renovate drains, sewers, water pipes, electrical conduits, heat and a/c ducts and more in concrete, PVC, fiberglass, clay, copper, cast iron, ductile iron, and steel pipes by brush casting a coating. The specially formulated coating resin forms a corrosion resistant or semi-structural repair inside the original pipe (depending on # of coats applied) that is a tested, safe and environmentally friendly product. The new pipe is corrosion resistant, anti-static, wear-resistant and non-corrosive. Thanks to a high breaking stretch, it also withstands shocks and bending.

USES/BASIC METHODOLOGY:

- Extend the life span of the original pipe: The resin can be used to prolong the life of an existing pipe. Clean the pipe well. Apply 2 or more (1mm/coat) layers of the Xpress resin.
- The new slick inner surface will increase the flow inside the pipe minimizing the risk of blockages.
- Create a new semi-structural pipe: Apply multiple coats of the resin (use design calculator based on pipe diameter found in the manual or later in this document) to form a seamless new pipe with a 2-4mm wall thickness depending on the pipe diameter. Estimated 30-50 year design life when using Semi-Structural Design Specifications based on pipe diameter.

BENEFITS FOR CONTRACTORS:

Extend the service life of a pipe, stop corrosion, create a new pipe, "patch" on top of CIPP liners and fortify connections*. Apply to small areas or all drains in multi-story buildings. The Picote Coating™ System is affordable, practical and easily fits in tight places.

BENEFITS FOR PROPERTY OWNERS:

Customers can stay at home or keep business open during drain renovation. A greener alternative eliminating the need to destroy existing walls, gardens or sidewalks, the no-dig solution reduces waste produced at job sites. Interruptions to traffic are also minimized. All materials used are non-toxic.

HOW LONG WILL THE PIPE BE OUT OF SERVICE?:

Dry to touch in 3 hours with ambient cure.

Return to Service/Light Wear: 4 hours.

Final Hardness: 24 hours.

Full service can be restored 4 hours after last coat has been applied (24hrs for potable)

TYPES OF PIPE:

Suitable for concrete, PVC, fiberglass, clay, copper, cast iron, ductile iron, and steel pipes. Preparation of the coating surface is dependent on the material of the pipe. Please see corresponding Picote Operation & Safety Manual.

OPERATIONAL SETUP:

The Picote Brush Coating™ System and Xpress Resin is powered by the Picote Millers. Picote Millers can also be used for pipe preparation, drain cleaning and reinstatements on lateral connections. The system is practical and easy to keep clean.

**Ensure that materials are compatible and the surface is properly prepared.*

TECHNICAL DATA SHEET

GENERAL DESCRIPTION	<p>Xpress Resin 100% Solids Epoxy</p> <p>Dual component epoxy used to rehabilitate concrete, PVC, fiberglass, clay, copper, cast iron, ductile iron, and steel pipes. Creating a monolithic corrosion barrier or semi-structural repair of decayed and damaged pipes. Designed exclusively for the Picote Xpress Brush Coating™ System.</p>
NUMBER OF COMPONENTS	2
MIX RATIO	1:1 mix ratio by volume in pre-packaged cartridges.
PACKAGE SIZES	<p>Picote Epoxy Base - White (Part A) = Bucket (2.94 gallons/11.13 litres), 30.86 lbs</p> <p>Picote Epoxy Catalyst - Black (Part B) = Bucket (2.94 gallons/11.13 litres), 24.15 lbs</p>
PIPE DIAMETER RANGE	1¼-12" (DN32-300) pipes.
WORKING METHOD	Coating applied with brush.
COLOR USAGE	Single Color (Grey)
APPLICATION EQUIPMENT	Picote Brush Coating™ System using Xpress Coating Pumps and Picote Millers.
LEVELING	Product is self-leveling.
GAS EMISSIONS	No harmful VOCs released during mixing or after hardening (VOC free).
DRY CONTENT/SOLIDS	100% solids (no solvents).
FLASH POINT	392°F (200°C).
GLOSS	Semi-gloss.
THINNER	Not used.
SHRINKAGE	100% Solids, does not shrink.
HUMIDITY	Hydrophobic, repels water.
UV RESISTANCE	Direct sunlight can alter color of coating.
STATIC/CONDUCTIVITY	Electrical insulating material, does not conduct electricity and is anti-static.
SURFACE PREPARATION	<p>All surfaces to be coated must be dry and clean, free from oil, grease, debris and other contaminants.</p> <p>Concrete: must be jetted and cleaned removing any loose concrete.</p> <p>Steel/Ductile Iron: Near-White SSPC-SP10/NACE 2. Acceptable methods: sand blast, chain flail, or Picote Smart Cutter™ and Side Grinding Panels</p> <p>Stainless Steel: Nace No. 1/SSPC SP-5 White Metal Blast cleaning is needed and is beyond the capability of Picote cleaning tools. White metal blast cleaning is to be used to clean unpainted or painted steel surfaces prior to applying high-performance protective coating or lining systems. SSPC-SP 5/NACE No. 1 removes all visible oil, grease, dust, dirt, mill scale, rust, coating, oxides, corrosion products, and any other foreign matter on the surface.</p>
POT LIFE	Mixed resin about 25 min @70°F (21°C).
RATE OF COVERAGE	<p>See Picote Resin Calculator (www.picoteinstitute.com)</p> <p>Average expected application per coat: .9-1mm (35.4-39.37 mils)</p> <p>Minimum expected application per coat: .8mm (mils (31.49 mils)</p> <p>Maximum expected application per coat: 1.2mm (47.2 mils)</p>

TECHNICAL DATA SHEET

NUMBER OF COATS

Number of coats required is dependent on pipe diameter and rehabilitation goal
Estimated 30-50 year design life when using Semi-Structural Design Specifications.

Resistance to High Pressure Water Jetting:

- Minimum 4 coats need to be applied.
- Maximum Jetting Pressure: 2600 PSI (180 Bar).

Corrosion Resistance:

- After cleaning metal pipes, corrosion will come back quicker without coating.

Pipe Diameter	# of Coats for Corrosion Resistance	# of Coats for Semi Structural
1¼" (DN32)	1	1
1½" (DN40)	1	1
2" (DN50)	2	2
3" (DN70)	2	2
4" (DN100)	2	3 to 4
6" (DN150)	2 to 3	4 to 5
8" (DN200)	3 to 4	5 to 6
9" (DN225)	4 to 5	6 to 7
10" (DN250)	4 to 5	7 to 8
12" (DN300)	5 to 6	8 to 9

HARDENING/CURE TIME

Recoat: 1 hours @77°F (25°C) using Picote Heater.

Restore flow: 4 hours (24 hours for potable water projects) @70°F (21°C).

Final Cure: 24 hours @70°F (21°C).

RECOAT

Can be recoated within 12 hours without additional pipe preparation.

After 12 hours must be abraded with Picote Smart Cutter™ Side Grinding Panels.

TEMPERATURES

Installation: 50-140°F (10-60°C).

Storage: Room Temperature 60-95°F (15.5-29°C).

Finished product: up to 180°F (82°C) in most commercial hot water applications.

MECHANICAL TESTING

ASTM Testing:

Tensile Strength	D638	3,727 PSI
Tensile Elongation	D638	5.4%
Flexural Modulus	D790	134,211 PSI
Flexural Strength	D790	3,490 PSI
Adhesive Strength	D4541	Currently in Testing
Adhesion Strength Metal:		Currently in Testing
Adhesion Strength Concrete:		Currently in Testing

)

TECHNICAL DATA SHEET

SHELF-LIFE	Unopened: 24 months from date of manufacture when stored according to recommended conditions. Opened: up to 6 weeks.
STORAGE TEMPERATURE	60-85°F (15.5-29°C).
CLEAN UP	Clean brushes using acetone. REFER TO SAFETY DATA SHEET FOR SAFETY AND HEALTH INFORMATION.
INDUSTRIAL SAFETY	Ready-measured product must not be in contact with skin (it adheres).
SAFETY DATA SHEET (SDS)	Available via QR code on resin packaging as well as online at www.picoteinstitute.com in Picote Xpress Resin Technical Document.
SHIPPING	The two part resin is packaged in sealed buckets. Suggested storage at room temperature and in accordance with the guidelines in Technical Data Sheet.
TECHNICAL ENQUIRIES	Ryan Boldan, Global Learning Solutions Director 1 (864) 940-0088 ryan@picotesolutions.com Richard Swan, Director of Client Technical Services 44 (0) 782 722 3237 richard@picotesolutions.com

RESIN USAGE CONSUMPTION

RESIN CALCULATOR:

The Picote Xpress Resin Calculator is an Excel spreadsheet that can be downloaded from the Picote Institute online learning platform at picoteinstitute.com. It calculates project resin usage based on pipe diameter, number of coats, and the length of the repair.

XPRESS COATING PUMP % INDICATOR and COATING SCALE

The Picote Xpress Pump has a % scale chart located on the clear front door that visually correlates to the cylinder position to indicate the % of a full stroke that the cylinders have covered. This information can be used along with Coating Scale Charts (also part of the downloadable Xpress Resin Calculator) to show the maximum distance, by pipe diameter that the remaining resin in the Xpress Pump cylinders will cover.

Xpress Coating Scale (USA)

Scale is the maximum distance one full stroke of the Xpress Pump will cover.

PICOTE BRUSH COATING™ CERTIFIED INSTALLER TRAINING

TRAINING CENTRES:

- Phoenix, Arizona, **USA**
- Porvoo, **Finland**
- Sandhurst, England, **UK**

Picote Certified Installer Training for Picote Brush Coating™ is highly recommended to get the most out of your investment and provide the highest quality finished results.

For Picote Brush Coating™ Certified Installer Training you will receive a Picote ID Card for completion (UK only), which can be used for the tendering process and on site.

Certificates are awarded for all certification trainings.

Visit our website at www.picotegroup.com or contact us at training@picotesolutions.com to find out about course offerings, pricing, and scheduling.

10 YEAR WARRANTY*

When using the Picote Brush Coating™ System as an option for semi-structural pipe rehabilitation you are providing a solution that can last 30-50 years. When you successfully complete Picote Certified Installer Training you will be able to offer a 10 year warranty on the Picote Xpress Epoxy Resin when you meet the outlined criteria. This provides assurance for the end-user as well as an advantage when you tender for work.

*Terms & conditions apply, ask for details.

ASTM TESTING EXPLAINED

TESTED PRODUCT: Picote Xpress Resin

TESTS 1&2

A total of 4 tests were performed including:

1.Tensile Strength 2.Tensile Elongation 3.Flexural Modulus 4.Flexural Strength

TEST 1: ASTM D638-14 "Tensile Strength"

A piece of finished product, with a maximum thickness of .125-inches, is machined into a dog-bone shape. Each end of the test specimen is placed in opposite facing clamps which then attempt to pull it apart.

The PSI that it takes to break the specimen is calculated as "Tensile Strength at the Break". The "Tensile Elongation at the Break" is an additional measurement that shows how much the product stretches during this test. The "Tensile Modulus" is a measure taken to test rigidity. All of these measurements make up the "Tensile Strength" test. The D638-14 test would simulate separating pipe joints and the effect that would have on the product in question.

TEST 1 RESULTS: Picote Xpress Resin Tensile Test

Test Method:	ASTM D638-14
Test Conditions:	23±2°C, 50±10% R.H.
Conditioning:	40+ hours, 23±2°C, 50±10% R.H.
Preparation:	Machined from sample sent by client
Specimen:	Type I tensile bars (2-inch gage length)
Cross Head Speed:	0.2-inches per minute

Sample	Replicate	Width (inches)	Thickness (inches)	Tensile Strength at Break (psi)	Tensile Elongation at Break (%)
Picote Xpress Resin					
		0.501 avg	0.104 avg	3,727 PSI	5.4%

ASTM TESTING EXPLAINED

TESTED PRODUCT: Picote Xpress Resin

TESTS 3&4

A total of 4 tests were performed including:

1.Tensile Strength 2.Tensile Elongation 3.Flexural Modulus 4.Flexural Strength

TEST 3: D790-15e2 "Flexural Modulus"

This test is used to measure the horizontal strength of the material. Supports are placed under the sample at each end, and then a piston drives down at the center. The force to drive down and the amount of deflection are measured to come up with the specimen's "Flexural Modulus".

This test would simulate areas in a coated pipe that are being subjected to uneven stress.

TEST 3 RESULTS: Picote Xpress Resin Flexural Test

Test Method:	ASTM D790-15e2, Procedure A
Test Conditions:	23±2°C, 50±10% R.H.
Conditioning:	40+ hours, 23±2°C, 50±10% R.H.
Preparation:	Machined from sample sent by client
Support Span:	3.641 inches
Cross Head Speed:	0.090 inches per minute

HTS Report #:	23-P-0626-01
Mr. Matt Peterson Quadex 564 W. 9320 South Sandy, UT 84070	Customer Project Name: XPress Customer Project No.: Date Sample Received: 10/30/23 Date Sample Tested: 11/02/23

One (1) plate sample was delivered to HTS' laboratory for testing. The sample was tested in accordance with ASTM D638 Type II and ASTM D790 Method I Procedure A. A Support Span-to-Depth Ratio of 16 to 1 was used as specified in the test standard ASTM D790. Thickness measurements, tensile strength, flexural stress, and flexural modulus of elasticity tests were performed on the sample. Five (5) specimens were cut and tested from the sample. The results summarized and reported below are averages of the five (5) specimens. A test report for the sample is attached.

SAMPLE ID	TENSILE STRENGTH (psi) ASTM D 638	TENSILE ELONGATION (%) ASTM D 638	FLEXURAL STRENGTH (psi) ASTM D 790	FLEXURAL MODULUS (psi) ASTM D 790
Xpress	3727	5.4	3490	134,211

The following table contains the thickness measurements for each individual specimen tested.

MEASUREMENT OF THICKNESS FOR CURED IN PLACE PIPE LINER ASTM D 2122										
									Combined Total Average/Specimen

SAFETY DATA SHEET

PICOTE BRUSH COATING™ EPOXY RESIN
XPRESS A (COLOR: WHITE)

Revision date: 8-9-2023

SAFETY DATA SHEET

SECTION 1 . IDENTIFICATION

Product Name: PICOTE Approved 3/29/23 Express 1:1 Product Code: XPRESS A

Picote Solutions
20810 SE 18th PL
Sammamish, WA 98075

EMERGENCY CONTACT: INFOTRAC
DOMESTIC & CANADA : 800-535-5053
INTERNATIONAL: 352-323-3500

SECTION 2. HAZARD(S) IDENTIFICATION

GHS Ratings:

Skin corrosion/irritation	3	Reversible adverse effects in dermal tissue, Draize score: $\geq 1.5 < 2.3$
Skin sensitization	1	Skin sensitizer
Carcinogenicity	2	Limited evidence of human or animal carcinogenicity

GHS Hazards

H316	Causes mild skin irritation
H317	May cause an allergic skin reaction
H351	Suspected of causing cancer

GHS Precautions

P201	Obtain special instructions before use
P202	Do not handle until all safety precautions have been read and understood
P261	Avoid breathing dust/fume/gas/mist/vapours/spray
P272	Contaminated work clothing should not be allowed out of the workplace
P280	Wear protective gloves/protective clothing/eye protection/face protection
P281	Use personal protective equipment as required
P321	Specific treatment (see ... on this label)
P363	Wash contaminated clothing before reuse
P302+P352	IF ON SKIN: Wash with soap and water
P308+P313	IF exposed or concerned: Get medical advice/attention
P332+P313	If skin irritation occurs: Get medical advice/attention
P333+P313	If skin irritation or a rash occurs: Get medical advice/attention
P405	Store locked up
P501	Dispose of contents/container to ...

Signal Word: Warning

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS number	Weight Concentration %
Epoxy Resin	25085-99-8	70.00% - 80.00%
Titanium Dioxide	13463-67-7	10.00% - 20.00%
Proprietary	68609-97-2	5.00% - 10.00%
Silica	67762-90-7	1.00% - 5.00%

SDS SHEET - XPRESS A, BASE WHITE - US

SECTION 4. FIRST AID MEASURES

If inhaled remove to fresh air. If breathing is difficult, give oxygen. Obtain medical advice if there are persistent symptoms

Rinse immediately with plenty of water for at least 15 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Remove contacts if present and easy to do. Continue Rinsing. Get medical attention, if irritation or symptoms of overexposure persists.

Immediately wash skin with soap and plenty of water.

If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person

SECTION 5. FIRE FIGHTING MEASURES

Flash Point: 252 C (486 F)

LEL: N/A

UEL: N/A

Not applicable

Foam, Carbon dioxide (CO₂) or dry chemical or water spray (water stream may be ineffective).

No information available

Not available

Firefighters, and others exposed, wear self-contained breathing apparatus.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Stop leak. Dike or contain spill. Pump into slavage tanks and/or absorb with suitable material. Use sparkless shovel to remove material. Evacuate area and keep unnecessary and unprotected personnel from entering the spill area.

Use appropriate containment and clean up immediately.

Stop leak, Dike and contain spill. Prevent spilled material from entering the ground, water and/or air by using appropriate containment methods.

SECTION 7. HANDLING and STORAGE

Avoid breathing vapor. Avoid contact with eyes, skin and clothing. Keep away from heat and flame. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling.

Avoid exposure to heat, light, and air for prolonged periods of time. Store in a cool, dry well ventilated area away from sources of heat and incompatible materials. Eliminate all ignition materials and incompatible materials.

Collect spill with non spark tools.

No information available.

SECTION 8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Chemical Name / CAS No.	OSHA Exposure Limits	ACGIH Exposure Limits	Other Exposure Limits
Epoxy Resin 25085-99-8	Not Established	Not Established	Not Established
Titanium Dioxide 13463-67-7	15 mg/m ³ TWA (total dust)	10 mg/m ³ TWA	Not Established
Proprietary 68609-97-2	Not Established	Not Established	Not Established
Silica 67762-90-7	Not Established	Not Established	Not Established

Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where

SDS SHEET - XPRESS A, BASE WHITE - US

such systems are not effective wear suitable personal protective equipment, which performs satisfactory and meets OSHA or other recognized standards. Consult with local procedures for selection, training, and maintenance of the personal protective equipment. Always use adequate ventilation that comply with local regulations.

Eye/Face Protection: Wear appropriate protective glasses or splash goggles as described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166.

Skin Protection: Chemical-resistant gloves and chemical goggles, face-shield and synthetic apron or coveralls should be used to prevent contact with eyes, skin or clothing.

Respiratory Protection: A NIOSH air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known or any other circumstance where air purifying respirator may not provide adequate protection.

SECTION 9. PHYSICAL and CHEMICAL PROPERTIES

Boiling Range 2500 to 3000 °C Lbs VOC/Gallon Less Water 0.00 % VOL by Volume 0.00	Specific Gravity (SG) 1.258 Lbs VOC/Gallon Less 0.00 Exempt
--	--

SECTION 10. STABILITY and REACTIVITY

Stable, Hazardous polymerization will not occur.

STABLE

Strong acids, caustics, oxidizers, Avoid uncontrolled exposure to Epoxy Resin, Amine.

No Data Found

None known, other than Sec. #2 and Sec #5

Hazardous polymerization will not occur.

SDS SHEET - XPRESS B, CATALYST BLACK - EUROPE

Signal Word: Danger

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS number	Weight Concentration %
Aminoethyl) piperazine, 1-(2-, (AEP)	140-31-8	80.00% - 90.00%
nonyl phenol	84852-15-3	5.00% - 10.00%
Amine	217-168-8	5.00% - 10.00%
Inert	INERT	1.00% - 5.00%
Black Pigment	1333-86-4	0.10% - 1.00%

SECTION 4. FIRST AID MEASURES

If inhaled remove to fresh air. If breathing is difficult, give oxygen. Obtain medical advice if there are persistent symptoms

Rinse immediately with plenty of water for at least 15 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Remove contacts if present and easy to do. Continue Rinsing. Get medical attention, if irritation or symptoms of overexposure persists.

Immediately wash skin with soap and plenty of water.

If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person

SECTION 5. FIRE FIGHTING MEASURES

Flash Point: N/A

LEL: N/A

UEL: N/A

Not applicable

Foam, Carbon dioxide (CO2) or dry chemical or water spray (water stream may be ineffective).

No information available

Not available

Firefighters, and others exposed, wear self-contained breathing apparatus.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Stop leak. Dike or contain spill. Pump into slavage tanks and/or absorb with suitable material. Use sparkless shovel to remove material. Evacuate area and keep unnecessary and unprotected personnel from entering the spill area.

Use appropriate containment and clean up immediately.

Corrosive. Avoid personal contact and breathing vapor or mist. Stop leak, Dike and contain spill. Prevent spilled material from entering the ground, water and/or air by using appropriate containment methods.

SECTION 7. HANDLING and STORAGE

Avoid breathing vapor. Avoid contact with eyes, skin and clothing. Keep away from heat and flame. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling.

Avoid exposure to heat, light, and air for prolonged periods of time. Store in a cool, dry well ventilated area away from sources of heat and incompatible materials. Eliminate all ignition materials and incompatible materials.

Collect spill with non spark tools.

No information available.

SECTION 8. EXPOSURE CONTROLS, PERSONAL PROTECTION

SDS SHEET - XPRESS B, CATALYST BLACK - EUROPE

Chemical Name / CAS No.	OSHA Exposure Limits	ACGIH Exposure Limits	Other Exposure Limits
Aminoethyl) piperazine, 1-(2-, (AEP) 140-31-8	Not Established	Not Established	Not Established
nonyl phenol 84852-15-3	Not Established	Not Established	Not Established
Amine 217-168-8	Not Established	Not Established	Not Established
Inert INERT	Not Established	Not Established	Not Established
Black Pigment 1333-86-4	3.5 mg/m3 TWA	3 mg/m3 TWA (inhalable fraction)	NIOSH: 3.5 mg/m3 TWA; 0.1 mg/m3 TWA (Carbon black in presence of Polycyclic aromatic hydrocarbons, as PAH)

Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactory and meets OSHA or other recognized standards. Consult with local procedures for selection, training, and maintenance of the personal protective equipment. Always use adequate ventilation that comply with local regulations.

Eye/Face Protection: Wear appropriate protective glasses or splash goggles as described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166

Skin Protection: Chemical-resistant gloves and chemical goggles, face-shield and synthetic apron or coveralls should be used to prevent contact with eyes, skin or clothing.

Respiratory Protection: A NIOSH air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known or any other circumstance where air purifying respirator may not provide adequate protection.

SECTION 9. PHYSICAL and CHEMICAL PROPERTIES

Specific Gravity (SG) 0.988	Lbs VOC/Gallon Less Water 0.00
Lbs VOC/Gallon Less 0.00 Exempt	% VOL by Volume 0.00

SECTION 10. STABILITY and REACTIVITY

Stable, Hazardous polymerization will not occur. Will react with Epoxy Resins especially at elevated temperatures

STABLE

Epoxy Resins under uncontrolled conditions. Mineral acids. Organic acid, oxidizers, Reacts with metals until reacted with epoxy.

None known

Hazardous polymerization will not occur.

SECTION 11. TOXICOLOGICAL INFORMATION

Mixture Toxicity

Component Toxicity

84852-15-3

nonyl phenol

Oral LD50: 1,300 mg/kg (Rat) Dermal LD50: 2,031 mg/kg (Rabbit)

SDS SHEET - XPRESS B, CATALYST BLACK - EUROPE

Eyes: Irritant to the eyes. Corrosive to Eyes
Skin: Irritant to the skin. Corrosive to Skin
Inhalation: Irritant to respiratory tract. Prolonged or excessive inhalation may cause respiratory tract irritation.
Sensitization: Skin sensitization in humans.
